

GRABO Erguo S1 Attachment (Model: B0007.ERG)

- One of the primary objectives of developing the GRABO was to help mitigate work-related fatigue and injuries. Prolonged periods of lifting materials in a hunched position can strain the back. To help with this, we have introduced the Erguo S1 portable lifting attachment.

- The Erguo S1 attachment is thoughtfully designed to ensure the ergonomic operation of the GRABO tool, reducing the need for bending. The attachment seamlessly fits into the four lifting lugs positioned next to the grab handles of the tool. With a simple activation of the GRABO tool, you can effortlessly lift and position your materials, all without the need to bend down. This streamlined process allows for swift and efficient material handling.

Attributes:

Product Code: B0007.ERG

Unit Of Sale: Each

About Product:

- To further enhance control and ease of use, the handbar of the attachment features an actuator that aids in maneuvering and controlling the various functions. This user-friendly feature ensures smooth operation and minimizes the risk of strain or discomfort during the lifting process.
- By incorporating the Erguo S1 attachment into your GRABO tool, you can optimize efficiency and protect your wellbeing by reducing the strain on your back and minimizing the potential for work-related injuries.
- The Erguo S1 attachment is compatible with the Grabo Plus and Pro models, but works best in conjunction with the Grabo Pro model, as it can move from slab to slab without turning it off, whilst still conserving battery life.

Specifications:

L x W x H	24.5 x 8 x 4.5" (620 x 200 x 113 mm)
Weight	2.1 lbs (~0.95 kg)
Material	10.2 kg (22.7 lbs)
Color	Black Anodize
Max. Lifting Weight	265 lbs
Features	Remote ON/OFF Lever
